History and Overview of Kuhn

Kuhn North America, Inc.

Video Link: youtu.be/BN8xNiAfvo0

Presentation Description

Joseph Kuhn, a blacksmith from Saverne, France, began manufacturing weighing equipment in 1828 and from that beginning the company evolved to become one of the largest implement manufacturers in the world. In this video, you'll learn about the necessary steps taken to grow a small enterprise into a global business marketing more than 13,000 machines each year. You'll all get a glimpse at the steps it takes to go from raw material to finished product.

About the Presenter

Kuhn North America, Inc., located in Brodhead, Wisconsin, is a leading innovator in agricultural and industrial equipment. Kuhn offers a broad range of hay and forage, livestock and crop production tools, as well as landscape and road maintenance equipment.

Supplemental Activities

Growing a Nation: Prosperity and Challenges

Link: agclassroom.org/matrix/lesson/539

Estimated time: 1 hour

Objective: Students will engage with the Growing a Nation timeline to explore the significant historical and agricultural events and inventions from American history during the years 1950-1969. Students will examine the cause and effect relationships of many post-war advances that took place in our country and discover how increases in science and technology changed agriculture.

An Agricultural Interview

Link: agclassroom.org/matrix/resource/264

Estimated time: One class period plus 2-3 weeks to conduct interviews

Objective: This activity prepares students to interview someone in an agricultural career. Students will gain a greater awareness of the role agriculture plays in the American economy, practice oral and written communication skills and learn about numerous agricultural careers.

Additional Resource: Watch the internship video provided by Kuhn: Internship Experience (youtu.be/WWK2bJybwOI)
